

TRAVELNDC

Kyle Wang
Business Development and Product

About TravelNDC

The first independent Aggregator in China

NDC level-3 Certified Aggregator

Our implementation

Implemented with British Airways based on V16.1

Also have connected with some other airlines and top agents

Provide V17.2 NDC API and front-end to agents

Schemas covered

End to end booking(AirShopping, SeatAvailability, OfferPrice, OrderCreate, OrderView)

Order Management(OrderList, OrderRetrieve, OrderCancel, OrderReshop, OrderChange)

Post-sale seat and baggage(ServiceList, OrderChange) (on-going)

Learnings from our implementation

- Standard make it easier for development
- V17.2 is more clear and less redundancy
- Aggregation is a tough job

Findings in Chinese market

Agent

- Well educated by NDC concepts
- Not too much experience with ancillary sales
- Limited development capacity

Payment

- Payment preference: Third-party payment
- VAT invoice(Not specific for NDC)

Ticketing

- BSP ticket VS airline ticket

Thanks.
