smartcheck

providing COVID-19 and health data to the travel industry
The world has changed.

People now have to consider health risk and COVID-19 exposure into all their decision making.
When researching flights, do you intend to look at COVID-19 stats during your shopping?

79%  21%
Travelers consider COVID-19 data as part of their shopping experience.

The most common COVID-19 stat presented is total deaths, which lacks context in relation to an area’s status.
When people search flights, and check COVID-19 data, this is how it gets portrayed...
Or even worse…
Display contextual COVID-19 data in your search experience.

Tie airport codes to health stats.

REST API with a JSON stream makes for quick adoption.
COVID-19 Stats for Singapore

Confirmed
14,423

Recovered
1,060

Deaths
12

Daily New Cases
